

HEALTHCARE BOARD INITIATIVE

JOIN NOW

The Leverage Network's (TLN) uniqueness and competitive advantage is its deliberate focus on increasing Board representation for Blacks in healthcare

TLN prepares Member Executives for board opportunities by utilizing the Power of 3 (P³) to build a robust pipeline of talented Black executives. The three-part strategy is established to:

- **Prepare** Executives for board opportunities by providing education, training and executive coaching through our network of black directors and strategic partners;
- **Position** Executives by enhancing their visibility and access within the industry through deliberate and intentional networking sessions, corporate partner introductions; and
- Proactively **promote** Executives for viable healthcare board opportunities.

WHO PARTICIPATES?

The Healthcare Board Initiative (HcBI) convenes a selected cohort of membership to participate in the program. The program is a six-month fellowship curriculum including, governance summits, webinars, networking opportunities and more!

Executives (C-Suite/EVP or equivalent with 10+ years' experience) enhance organizational performance by ensuring diversity of thought, perspectives and experiences. This class, once seated, is charged with holding their boards accountable for establishing a diverse membership that can assist healthcare organizations in their ability to adapt to an ever-changing healthcare.
